**01/05/2021**

HOCHTIEF has been awarded by DEGES the contract for construction of the complex 2.2-kilometer-long noise protection tunnel Altona on the A7 highway in Hamburg including access and exit roads. The project has a total volume of around EUR 580 million (net). HOCHTIEF will take on the technical lead and has a 65 percent share in a joint venture.

Work between the A7 junctions Othmarschen and Volkspark is expected to start in April 2021 and be completed by 2028. The Altona tunnel is the longest of the three "Hamburg lids" which are constructed by HOCHTIEF in the city area of Hamburg and contribute significantly to reducing the local residents' noise exposure.

**HOCHTIEF** is an engineering-led global infrastructure group with leading positions across its core activities of construction, services and concessions/public-private partnerships (PPP) focused on Australia, North America and Europe. With around 53,000 employees and a sales volume of about EUR 26 billion in 2019, HOCHTIEF's global presence is focused on developed markets. Via CIMIC, the Group is market leader in Australia. In the USA, HOCHTIEF is the No. 1 general builder via Turner. Flatiron ranks among the most important players in the field of civil works, mainly in transportation infrastructure. HOCHTIEF owns a 20% stake in Abertis, the leading international toll road operator. Thanks to its commitment to sustainability, HOCHTIEF has been listed in the Dow Jones Sustainability Indexes since 2006.
